A large central image of the RASOR RS1 battery-driven scissor. It is black with orange accents and has a textured grip. A red LED light is visible at the tip of the blades. Several callout circles with orange borders point to specific features: the battery slot, the ergonomic handle, the smart button, the carbide blades, the LED light projection, the recharge docking station, and the wall charger. The background is a light blue gradient.

BATTERY SLOT

SMART BUTTON
manual/automatic use selctable
with safety lock
